EXPERIENCE

Supported the contract for NASA with scanning services for paper and film conversion for a host of project close outs.

The conversion consisted of hundreds of boxed records and microfilmed files with a data capture process to map to the NASA document repository for archive.

A multi-year contract with various work authorizations with quick turnaround timelines.

Supported the contract for NASA EVA 1 through EVA 3 Space Suit documentation files and deviation records – scanning of the project paper documents and data captured for various tracking, analysis and archival systems.

This multi-project contract consisted of the development of 3 teams on different record types working simultaneously over a 2 year timeline.

Scanning and data capture for a series of Archeology Library records for the South Central region. 400,000 documents with a 60-day time line – completed on time.

Support the GPO on various scanning and conversion projects in the southern region.

Paper document scanning and data capture for records archiving.

Handled transport, conversion and destruction as needed for various projects in support of the requests from agencies made to the GPO.

Texas Department
of Public Safety

Scanning and data capture for the Crime Lab division. 13 locations throughout the State of Texas Hundreds of boxes of records to be digitized with data extraction.

Handled the transport and conversion with an accelerated turn around to utilize the available budget.
